

# SECURE **MagSafe**

## Tactical Style, Engineered Durability

Employing a distinctive combination of three materials for a sleek performance-inspired look and rugged functionality, Raptic Secure MagSafe iPhone cases are the ideal accessory to protect and showcase the latest Apple iPhones. The dual-layer frame utilizes TPU and Raptic's DropShield™ material to provide military-grade drop protection to keep your new iPhone safe from drops of up to 13 feet, while the clear & frosted polycarbonate back protects against scratches and allows the phone's original style to be seen. Built with MagSafe provides complete functionality for cord-free charging and secure attachment to MagSafe accessories. Raptic Secure is also engineered down to its biodegradable packaging to be carbon neutral. Using recycled materials in its frame and incorporating EcoElement™ to make the entire case biodegradable when discarded, Raptic Secure offers an eco-friendly option for customers who demand sustainability as well as functionality & looks.
